Merkle Tree

Instant Auditing of Cloud Storage Access by Cache Partial Merkle tree

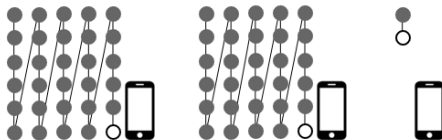

2014 IEEE 6th International Conference on Cloud Computing Technology and Science

Worst-case

若有個 device 很久沒有使用，在讀寫檔案前需要更新大量未做的動作

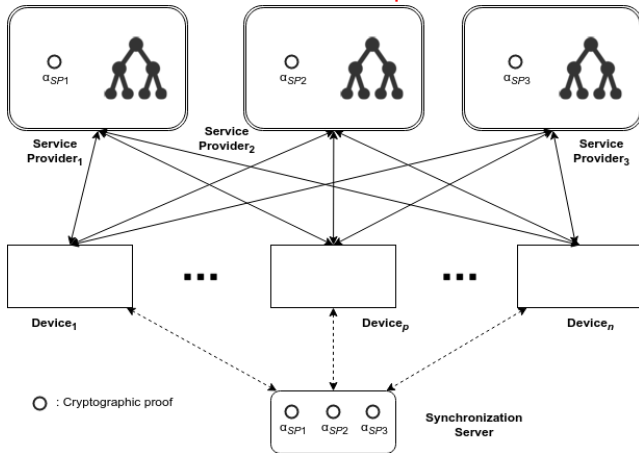

使用者將會明顯感受到漫長的等待時間

My Method

Assumption: 同時有 k 個 server 上同一 file 出問題的機率 ≈ 0

Service Providers are Independent Cloud

- Pros

- ① Device 不用儲存、也不用修改 Merkle tree, 既省空間又省時間
- ② 資料有多份備份
- ③ 解決之前的 Worst-case

- Cons

- ① 需要傳送多份 Request, 處理多份 Response

Flowchart

Request & Response

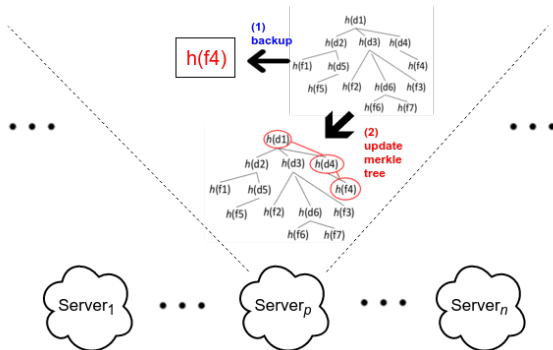

$$REQ = (OP, [OP]_{pri(D)}) \quad (1)$$
$$OP = (TYPE, PATH, HASH)$$

$$ACK = (RESULT, REQ, [RESULT, REQ]_{pri(S)}) \quad (2)$$
$$RESULT = (roothash, filehash)$$

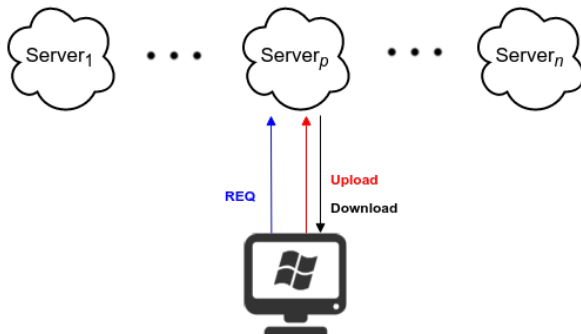

collect ACKs and voting

if Operation is UPLOAD

Server Update Merkle tree

File Transmit

- ∴ ACK 中有 roothash
- ∴ 新的 request 之前，所有的檔案都經過檢查，沒有問題

device request OP_i ，收到回傳的 ACK_i
發現 $Server_p$ 的 ACK 有錯誤，因此向 $Server_p$ 稽核

device 向 $Server_p$ 索取 MT_{i-1}
(MT_{i-1} 為執行 OP_i 之前的 Merkle tree)

①② 兩點有一個出錯就能確定 $Server_p$ 出錯

- ① device 檢查 MT_{i-1} 的 roothash 應和 ACK_{i-1} 中的 roothash 一樣
- ② device 以 OP_i 中的 hash value 來更新 MT_{i-1} ，
更新後的 roothash 應和 $Server_p$ 現在的 roothash 相同

4 Experimental Results

Experimental Results

	Size	File	Directory	Merkle tree Size
A	777 MB	48	6	5.4 KB
B	145 MB	54198	188	5.08 MB
C	5.95 GB	45089	1459	4.37 MB

Table: GENERATE MERKLE TREE'S TIME (IN SEC.)

		A	B	C
PC	Generate	14.876	61.176	198.405
	Serialize	0.040	0.756	0.670
	Deserialize	0.009	0.299	0.295
VM	Generate	6.821	144.267	620.151
	Serialize	0.011	0.343	0.299
	Deserialize	0.015	1.016	0.860

Experimental Results

Table: THE EXECUTION TIME OF **UPLOAD** OPERATIONS (IN SEC.) (Account C)

Test File Size	Non POV	Voting	2014 CloudCom
< 10 KB	0.005518	0.037380	0.218630
< 100 KB	0.015352	0.039608	0.232741
< 1 MB	0.056828	0.105343	0.272903
< 10 MB	0.359668	0.391630	0.567197

2014 CloudCom Worst-case

Synchronize (HashChain length = 100) cost **0.595 sec.**

Synchronize (HashChain length = 1000) cost **5.54 sec.**

Experimental Results

Table: THE EXECUTION TIME OF **DOWNLOAD** OPERATIONS (IN SEC.) (Account C)

Test File Size	Non POV	Voting	2014 CloudCom
< 10 KB	0.213026	0.036708	0.231693
< 100 KB	0.219071	0.074291	0.237524
< 1 MB	0.258437	0.191194	0.271910
< 10 MB	0.548203	1.033431	0.551122

(數據有問題需更正)

2014 CloudCom Worst-case

Synchronize (HashChain length = 100) cost **0.827 sec.**

Synchronize (HashChain length = 1000) cost **7.871 sec.**

Thank
You!
